

Ramratan Gupta

Full Stack Engineering Leader | Cloud Architecture | Platform Engineering | Agentic AI

ramratan.gupta@gmail.com +91 7701983357 South Delhi, India [LinkedIn](#) [GitHub](#) [Website](#)

PROFESSIONAL SUMMARY

Full Stack Engineering Leader with 15+ years of experience building and scaling SaaS platforms, cloud-native applications, and enterprise systems. Expertise in ReactJS, Go, NodeJS, PHP, Python, AWS, Kubernetes, OpenShift, and distributed systems. Proven track record of leading engineering teams, optimizing cloud infrastructure costs by 45%, and maintaining 99.99% platform availability. Experienced in leveraging Generative AI, Agentic AI, and custom AI agents to improve developer productivity, automate testing, increase code coverage, accelerate vulnerability remediation, and streamline software delivery.

WORK EXPERIENCE

Senior Software Developer

Apr 2025 – Present

IntraEdge (Client: American Express) · Bangalore, India

- Assigned as Software Engineer II within the American Express engineering organization, contributing to enterprise-scale platform development and AI-driven engineering initiatives.
- Leading full-stack development using ReactJS and Golang, development, testing, and deployment activities.
- Developed AI-powered test coverage agents and agentic workflows that increased overall code coverage by 30% and enabled critical modules to achieve up to 90% test coverage.
- Leveraged GitHub Copilot, ChatGPT Enterprise, Amazon Q, and custom AI agents to automate testing, vulnerability remediation, documentation, and code reviews.
- Improved engineering productivity by 40% through AI-assisted development workflows.
- Supported CI/CD pipelines, OpenShift deployments, production releases, and operational excellence initiatives across enterprise-scale environments.
- Partnered with DevOps teams to improve deployment reliability, developer experience, and software delivery efficiency.

Senior Lead Full Stack Engineer

Jan 2022 – Feb 2025

Knexus · Gurugram, India (Remote)

Served as Head of Development & DevOps, leading full-stack engineering, cloud architecture, DevOps transformation, and cross-functional team leadership for a multi-tenant SaaS platform supporting 1M+ global users.

Lead Full Stack Engineer

Jun 2014 – Dec 2021

Knexus · Gurugram, India

Progressed from full stack engineer to lead engineer, architecting scalable SaaS solutions, driving cloud infrastructure development, and delivering enterprise-grade applications across global client engagements.

Software Developer

Jun 2012 – May 2014

DigitasLBi · Gurugram

Delivered 30+ web applications, admin dashboards, and social media integrations using PHP, jQuery, JavaScript, and REST APIs. Integrated Facebook, Twitter, LinkedIn, and YouTube APIs, delivering client projects within 3–15 day timelines.

IT Executive

Dec 2009 – Jun 2012

Alethia Education Services · Gurugram

Built corporate websites, email automation, and attendance systems using PHP and MySQL. Integrated AWS SES for high-volume email delivery (100,000+ emails/day) and developed a lead management system to enhance customer engagement.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

2004 - 2008

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

SKILLS

Frontend Development

ReactJS, JavaScript (ES6+),
HTML5 / CSS3, TypeScript

Backend Development

NodeJS, Golang, Python, PHP

Architecture

RESTful API Design, Multi-Tenant SaaS Architecture, Microservices Architecture

Cloud & DevOps

AWS CloudFormation, AWS EC2 / S3 / RDS / Lambda, CI/CD Pipelines, OpenShift, Docker, Kubernetes, Nginx, Site Reliability Engineering (SRE), Observability, Infrastructure as Code (IaC), Cloud Migration

Databases

MySQL, Redis, CouchDB, Elasticsearch

GenAI & Automation

Amazon Q, ChatGPT Enterprise, GitHub Copilot, Google Gemini, Prompt Engineering, Custom AI Agents, Agentic Workflows, AI-Assisted Development Automation

Leadership & Process

Agile / Scrum, Technical Hiring & Mentoring, Performance Optimization, Code Review & Quality Assurance

Architecture & Engineering

System Design, Scalability, Distributed Systems, Platform Engineering, Staff Engineering, Technical Strategy

Security

Application Security, Vulnerability Management, OAuth 2.0, JWT, Okta

CERTIFICATIONS

Generative AI & Agentic AI Bootcamp

Cutting Edge School & Heartfulness Academy · 2025

PROJECTS

Multi-Tenant SaaS Platform (Knexus)

Architected, developed, and scaled a multi-tenant SaaS platform serving 1M+ global users across 10+ enterprise clients. Delivered 200+ RESTful APIs, achieved 99.99% uptime via high-availability AWS CloudFormation setups, and drove 45% AWS cost optimization through infrastructure automation and security hardening.

Technologies: ReactJS, PHP, Symfony, NodeJS, AWS CloudFormation, MySQL, Redis, CouchDB, Elasticsearch, Nginx, PHP-FPM

AI-Driven Gita Learning Assistant (Personal Project)

Designed and built a GenAI-powered learning assistant using advanced prompt engineering and conversational AI techniques to deliver age-specific Bhagavad Gita guidance. Developed multilingual learning workflows incorporating storytelling, contextual reasoning, reflection, and knowledge validation. Experimented with custom AI agents, structured prompts, and educational conversational design to improve engagement and learning outcomes across different age groups.

Technologies: Gemini Gems, Prompt Engineering, Generative AI, Agentic Workflows, Conversational AI

AWS Cloud Modernization & HA Infrastructure

Overhauled legacy AWS cloud environment, implementing automation frameworks, upgrading network security and firewalls, executing server migrations, and engineering 99.99% high-availability architectures. Achieved 45% reduction in AWS infrastructure costs while improving deployment speed and system reliability.

Technologies: AWS CloudFormation, EC2, S3, RDS, Lambda, Nginx, Redis, MySQL, CI/CD Pipelines, AmazonQ
